

Bias in Health Professions Education

Friday, January 19, 2018 with Michael T. Cooper, M.D, Clinical Assistant Professor, Department of Pediatrics, OUHSC College of Medicine

Learning Objectives

1. Define implicit and explicit bias.
2. Describe available literature regarding different types of bias in medicine.
3. Identify strategies to reduce the impact of bias on medical practice and how these strategies could be adapted to the medical education environment

NOTES:

Presenter Bio:

Dr. Cooper is a pediatrician on faculty at OUHSC in the Department of Pediatrics, Section of General and Community Pediatrics. He attended medical school at University Alabama Birmingham, and completed his pediatrics residency training at OUHSC in 2004. After seven years in private practice, he spent 3 1/2 years living in Peru and working in the urban informal settlements surrounding Lima. Dr. Cooper returned to OUHSC in early 2015. He works at a departmental Spanish speaking outreach clinic and attends on the inpatient wards. His research focuses on health disparities and health literacy with a special focus on the Spanish speaking population.
