

What has changed?

The new Quiz Builder experience is an updated workflow within the existing Quizzes tool for creating, importing, editing, deleting, and reordering questions, question pools, and sections within quizzes. It streamlines the quiz creation and editing process without compromising advanced features. Instructors no longer have the option to opt into or out of the new experience and all instructors who create or edit quiz questions will do so using the new Quiz Builder.

What is Quiz Builder?

Chemistry Final Quiz

1 Add Import 2

Total Points 6 3

4 Shuffling is off at the quiz level

1 A reaction between an acid and a base is called a 1 point
Multiple Choice • Mandatory • Also in Question Library, Biology Final Quiz

2 When LiOH and H3PO4 react with each other, which of the following salts will be formed? 1 point
Multiple Choice • Mandatory • Also in Question Library, Biology Final Quiz

3 When SO3, a non-metal oxide, is mixed with water, which of the following will be formed? 1 point
Multiple Choice • Mandatory • Also in Question Library, Biology Final Quiz

4 Black coffee has a pH of approximately 5.0. What colour will the indicator bromthymol blue be in a solution of co... 1 point
Multiple Choice • Mandatory • Also in Question Library, Biology Final Quiz

4 Advanced Questions
Section • Shuffling is on

5 Which of the following compounds is a base? 2 points BONUS 5
Multiple Choice • Mandatory • Also in Question Library, Biology Final Quiz

6 Which of the following equations is correct and balanced for a reaction between sulfuric acid, H2SO4, and s... 2 points BONUS
Multiple Choice • Mandatory • Also in Question Library, Biology Final Quiz

1. The ability to add new questions, question pools, and sections directly from Quiz Builder. Once a question is added, instructors can see the order of the question compared to other questions, as well as pertinent details such as the question type.
2. The ability to import questions from the Question Library or a CSV file.
3. The ability to see a tally of the total points within a quiz as well as the points assigned to individual questions for easy error checking and updating.
4. The ability to see question shuffling states if shuffle is used at any level of a quiz. This makes it easy to confirm question shuffling is happening at the right level, for example at the quiz root or for a specific section.
5. Quiz Builder is designed to highlight pertinent details about the questions used in a quiz, such as the question type, mandatory and bonus status, and whether the question is used in more than one location. This makes it easy for instructors to review their quiz and make appropriate adjustments without having to drill into each individual question.

Add Import Total Points 6

Shuffling is off at the quiz level

- 1 A reaction between an acid and a base is called a 1 point
- 2 When LiOH and H3PO4 react with each other, which of the following salts will be formed? 1 point
- 1 A reaction between an acid and a base is called a 1 point
- 3 When SO3, a non-metal oxide, is mixed with water, which of the following will be formed? 1 point
- 4 Black coffee has a pH of approximately 5.0. What colour will the indicator bromthymol blue be in a solution of co... 1 point

Advanced Questions

- 5 Which of the following compounds is a base? 2 points BONUS
- 6 Which of the following equations is correct and balanced for a reaction between sulfuric acid, H2SO4, and s... 2 points

1. A key feature of Quiz Builder over legacy question editing screens is this ability to reorder questions inline. Reordering is supported as a drag-and-drop interaction or via keyboard interactions with appropriate feedback for non-visual users. Keyboard interactions are initiated by tabbing to a question and then using arrow keys to move a question up or down in a list. Left and right arrows allow questions to be moved into or out of sections.

Advanced Questions

- 5 Which of the following compounds is a base? 2 points BONUS
- 6 Which of the following equations is correct and balanced for a reaction between sulfuric acid, H2SO4, and s... 2 points BONUS

1. Another advantage of Quiz Builder is the ability to apply bulk actions to questions directly from the main Quiz Builder page. Selecting quiz questions reveals bulk actions such as delete, toggle bonus, toggle mandatory, set points and align to learning outcomes.
