

Quizzes: Shuffle Versus Random Question Pool

Use the visualization below to understand how different quiz features function.

Quiz Feature	How to Enable	Action	Quiz Statistics Available?	Quiz Item Analysis Report Available?
Shuffle at quiz level	Assessments>Quizzes>Edit Quiz> Properties tab	Distributes individual questions <u>and</u> section folders in random order for each student at the quiz level. Does not cascade to sub-sections.	Yes	Yes, if no question pools included.
Shuffle questions in this section	Assessments>Quizzes>Edit Quiz>Add/Edit Questions>Edit section	Distributes individual questions within a section folder in random order for each student.	Yes	Yes, if no question pools included.
Randomize question answers for each student	Assessments>Quizzes>Edit Quiz>Add/Edit Questions>Edit question	Shuffles the order of multiple choice question answers for each student.	Yes	Yes
Question pool	Assessments>Quizzes>Edit Quiz>Add/Edit Questions>New Question Pool	Distributes a unique set of questions to individual students from a designated pool of questions. Example: Distributes 15 questions to each student out of a pool of 25 questions. No student receives the same set of 15 questions.	No	No
