

Assignments - Assignments page column name | Updated

This feature updates the **New** column name on the **Assignments** page to read as **New Submissions**.

Brightspace Pulse - Pin and unpin courses | New

To help learners more easily find their current courses in Brightspace Pulse for iOS, learners can now pin and unpin courses from the Courses screens. Pinning a course ensures it remains at the top of the screen for easy access. Previously, learners could only pin and unpin their courses in Brightspace Learning Environment.

To pin or unpin a course in Brightspace Pulse, do one of the following:

- From the Courses screen, tap the ellipses (...) icon in a course tile.
- From the Course Homepage screen, tap the ellipses (...) icon at the top of the screen.

From the list of actions, tap **Pin** or **Unpin**. A pinned course is denoted by a  **Pin** icon. Unpinning a course removes the pin icon.

Groups – Set exact time learners can self-enroll | Updated

When setting up groups that allow learners to self-enroll, instructors can now add an exact time when enrollment opens, and an exact time when self-enrollment expires. Previously, instructors could only set the date when enrollment opened or expired.

Quick Eval – Support for anonymous marking | Updated

Assignments created with the **Hide student names during assessment** option selected now display in Quick Eval's Submission view with learner names and profile images hidden. Instructors using anonymous marking can access Quick Eval with confidence that it supports their anonymous marking needs.

Rubrics – Confirmation message for partially unevaluated rubrics | New

To prevent publishing partially unevaluated rubrics, the publishing workflow in the new Rubrics grading experience now includes a confirmation message that warns users when the rubric is not fully evaluated. Instructors have the option to continue publishing, or cancel. Warning messages appear when publishing a rubric for an individual student and when bulk publishing rubrics. Users attempting to publish an incomplete rubric evaluation must now click **Publish** to complete the workflow.

Rubrics – Improved accessibility in Rubric grading | Updated

In Rubrics, when using keyboard navigation to tab to a row of selectable cells, there is now a focus indicator to help orient users on the page.

Rubrics – Overall Score levels calculated after rubric criteria completion | New

In the new Rubrics grading experience, the Overall Score level is now only calculated after all the criteria in the rubric have been assessed. This change optimizes rubric performance by eliminating the calculation of incomplete Overall Score levels until the rubric evaluation is completed, and improves the grading experience for instructors and rubric evaluators.
