

Assessment Quality dashboard now available to faculty | New

The Assessment Quality dashboard provides a visualization to help users understand the quality of assessments using quiz and question statistics such as reliability, average grade, and correlation for all quiz and question types. All quizzes and questions that have had at least one quiz attempt in the last 12 months appear on the top level of the visualization. Only each user's first attempt is included in the dashboard, as subsequent attempts bias the metrics by which quiz and question quality are measured. Access this tool by clicking on Course Admin > Insights Portal.

You can export the visualizations in this dashboard to .CSV, .XLS, or .PPT using the export icon. You can view the visualizations as a table by clicking the table icon, or return to the visualization by clicking the table icon again.

EXIF data warning appears when uploading images | New

In some instances, when users upload .jpg files in any file upload area across Brightspace Learning Environment, an EXIF (exchangeable image file) data warning appears informing the user that the file may contain geolocation data.

Grades – Tab delimited import into Gradebook | New

Users can now import tab separated value (.tsv) files into Gradebook. Previously, users could only import comma delimited files into Gradebook, which created a usability issue in some international regions.

Quick Eval – Course level filtering | New

When assessing discussions, instructors have new multi-select options to Publish Feedback and Retract Feedback. In the Status column, the Draft / Published checkbox has been replaced by information on the date when feedback was saved as draft or published. These changes are visible on both the Users and Assessments tabs. The Save, Save and Close, and Cancel buttons have also been removed as their functionality has been replaced by the Publish Feedback and Retract Feedback options.

Quick Eval – Dismiss activities until next submission | New

Instructors can now remove items from their Quick Eval list until a new submission is received for the activity. The removed activity appears on the Dismissed Activities list and can be restored at any time. Once a new submission arrives to the Quick Eval list, the previously dismissed activity reappears there.

Previously, instructors could only select a specific date or forever when dismissing an activity. This new option provides instructors with an additional option to manage the submissions on their Quick Eval list.

Wiggio – End of life | Removed

Effective February 2020, Brightspace Wiggio is no longer available to users.
