

Improving Your Presentation Graphics

Friday, November 19, 2004 with Kari Boyce, Associate Dean, College of Allied Health

This session focused on guiding the participants toward improving the quality and functionality of graphic elements they use in computer-based slide shows.

Learning Objectives

- Discuss and demonstrate selective and intentional use of presentation graphics to: (a) improve initial learner comprehension of concepts, (b) enhance retention of related concepts, and (c) reinforce associated formula or calculations.
- Provide recommendations for presentation fonts, colors, backgrounds and bullets.
- Provide definitions and examples of: (a) visual literacy and (b) information literacy..
