Activity

Conclusions

Learning Objectives

- ✓ Define telemedicine, telehealth, and mHealth
- ✓ Describe nationwide trends in telemedicine education
- ✓ Compare bedside manner to “websites” manner
- ✓ Describe strategies to complete an online physical exam
- ✓ List stakeholders and strategies to teach telemedicine at OU

Conclusions

Telemedicine and Telehealth

Telehealth: remote healthcare services *including non-clinical services*; (1) provider training; (2) administrative meetings; (3) continuing medical education; (4) supply-chain tracking; (5) monitoring^{1,2}

Telemedicine: remote diagnosis and treatment of patients by means of telecommunications technology; (1) real-time appointments; (2) store-and forward messaging; (3) diagnostic outsourcing; (4) chronic illness management; (5) acute care monitoring^{1,3-4}

mHealth: health apps accessed using mobile technology; considered a subcategory of **telehealth** and **telemedicine**

Pandemic Impact on Trends

- 5% of encounters at **Stanford Primary Care** were virtual in 2019; by spring 2020, **90% of encounters** (232 visits/day) were virtual¹
- **American Well** (AmWell) reported telemedicine visits **up 2000%** in March 2020; usage of their app up **158%**²
- **VA reported a 200%** jump in telemedicine visits for 2020; in 2019, 900,000 veterans used Video Connect App⁴
- **University of New Mexico project ECHO** and partners sponsored **Telemedicine Hack** peer-to-peer learning

Activity: Online Resources

| Type | Sponsor | Description | Link |
|-------------------|--|--|---|
| General | National Consortium of Telehealth Resource Centers | A consortium of 12 regional and 2 national center funded by HRSA; huge list of resources | https://www.telehealthresourcecenter.org/ |
| | Heartland Telehealth Resource Center | A one-stop shop of resources serving Oklahoma, Kansas, and Missouri | http://heartlandtrc.org/covid-19/ * (for demonstration) |
| | Center for Connected Health Policy | A clearinghouse of policies and regulations for telehealth administration | https://www.cchpca.org/ |
| Educational | TRAIN | Includes an online repository of Telemedicine Hacks Produced by University of New Mexico | https://www.train.org/main/home |
| | American Telehealth Association | A non-profit association that host a “learning center” with guidelines and toolkits | https://www.americantelemed.org/resource/ * (for demonstration) |
| | AAMC | A springboard site for educational resources in telemedicine (including MedEdPortal) | https://www.aamc.org/data-reports/curriculum-reports/interactive-data/content-documentation-required-courses-and-elective-courses |
| | Telehealth Village | Accredited online educational site sponsored by regional resource center and UVA | https://telehealthvillage.com/home.aspx |
| | Project ECHO | An innovation hub based at University of New Mexico with many learning programs | https://hsc.unm.edu/echo/institute-programs/ |
| Etiquette & Exams | Old Dominion University | Online playlist of communication topics | https://www.youtube.com/results?search_query=old+dominion+telehealth+etiquette+playlist |
| | Old Dominion University | Online playlist of exam examples by organ system | https://www.youtube.com/playlist?list=PLM0VF0yZsE6eRiWVQ-RwnkIqruaFzDAON * (for demonstration) |
| | Thomas Jefferson University | AMA PRA Cat I CME on telemedicine physical exam | https://cme.jefferson.edu/content/telemedicine-providers-conducting-effective-telehealth-physical-exam |

Telemedicine Best Practices: Basics

Organizational priorities

- ✓ Technology
- ✓ Security
- ✓ Reimbursement
- ✓ Training

Clinician priorities

- ✓ Communication
- ✓ Workflow
- ✓ Autonomy
- ✓ Safety

American Telemedicine Association, 2013

Best Practices: Communication

- ✓ Professional attire
- ✓ Simple background
- ✓ Proper lighting, quiet space
- ✓ HIPAA compliant space
- ✓ Two to three feet away from camera
- ✓ Eye contact; look into camera
- ✓ Headphones/headset on hand
- ✓ Think-aloud, especially if off-screen

American Telemedicine Association, 2013

Best Practices: Workflow

- ✓ Use a script
- ✓ Verify patient identity and your credentials
- ✓ Confirm contact information and call-back protocol
- ✓ Expectations regarding contact between session
- ✓ Verify patient location to
 - (1) comply with licensing laws;
 - (2) for emergencies and patient safety;
 - (3) protect privacy and confidentiality

American Telemedicine Association, 2013

Best Practices: Safety

- ✓ Be familiar with originating site emergency protocols
- ✓ **Emergency plan** with local emergency personnel, phone numbers, and available resources
- ✓ Consider engaging a family member or a community member (called a “Patient Support Person”)
- ✓ Be aware of any transportation limitations and have a plan

American Telemedicine Association, 2013

Best Practices: Autonomy

- ✓ Telemedicine laws require informed consent similar to in-person care; information specific to videoconferencing
- ✓ Key topics include
 - (1) confidentiality risks inherent with technology;
 - (2) plans and protocols;
 - (3) processes for storing documentation and data;
 - (4) expectations for billing and reimbursement;
 - (5) conditions for an in-person referral

Conclusions

Virtual Physical Exam

Philosophy

- Virtual exams are an effectiveness and implementation issue
- The appropriate comparator is the alternative
- Might get more information than an office visit (context)
- Focus upon education and health literacy

Practice

- Direct observation at different camera angles
- Recruit patients and family members to assist
- Exam scripts and EMR templates specific to diseases and problem representation
- If an originating site, assistant with extender devices

Joshi, JeffConnect Program, Amwell 2020

Activity

Conclusions

Virtual Physical Exam

- **Vitals:** pulse, respiratory rate, blood pressure, temperature
- **ENT:** smartphone – head, neck, oropharynx, dental pain, lean forward
- **Abd:** palpating, jumping in place, supine positioning, rebound
- **Pulm:** breathing rate, inspiratory/expiratory time, peak flow, inhaler
- **Card:** edema check, neck veins
- **Neuro:** flashlight – cranial nerve exam, grip strength, standing and gait
- **Msk:** joint inspection, joint range of motion, provocative manouvers
- **Skin:** visual inspection, blanching, flaking, tenting
- **Psych:** memory, behavior, mental status

Virtual Physical Exam

How do we teach and assess the physical exam?

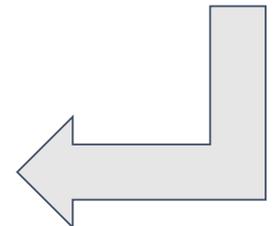

Auscultation-Posterior Chest

Diaphragm Only.

Breath Deep In and Out Through Mouth.

2 Levels on Each Side, 4 locations

Compare right and left

Activity

Conclusions

Local Educational Initiatives

- ✓ Pivot from face-to-face encounters to virtual encounters...in about 2 weeks
- ✓ Tele-encounters are here to stay -- curricular modifications
- ✓ Opportunities to collaborate and deliver across geographic distances
- ✓ Opportunities for development of novel simulations

Conclusions

Simulation Centers

- ✓ Simulation centers exist on all three campuses
 - Tulsa: OU-Tulsa Simulation Center, Schusterman Center
 - OKC: Clinical Skills Education and Testing Center (CSETC), Garrison Tower
 - Norman: School of Social Work Simulation Center, Anne and Henry Zarrow School of Social Work

- ✓ Collectively, we serve:
 - Medicine, PA, Nursing, Social Work, Allied Health, Dentistry, Pharmacy, Education, Haruv USA, OU Physicians-Tulsa, external agencies

Inter-professional Education: IPE Virtual Simulation Activities

- ✓ SAME/FAME - Center for Learning & Leadership / UCEDD
Model for community-informed simulations
- ✓ Nursing Mental Health Simulations - virtual Fall 2020
Opportunities for IPE involvement
SBIRT, Depression (Risk Assessment), Psychosis, Pediatric Anxiety,
Dementia - Role of the Caregiver
- ✓ Trauma Simulation - virtual Summer 2020
Collaboration between:
 - Office of Diversity Equity & Inclusion (ODEI)
High School students interested in Health Professions - TRU-OK community - tribal,
rural, underserved communities of Oklahoma
 - OUHSC PA program
PA Learners
 - Inter-professional Education (IPE), Office of Interdisciplinary Programs (OIP)
 - Clinical Skills Education & Testing Center (CSETC)

Simulation Looks Different Virtually

- ✓ Short skills practice sessions - recorded or not recorded
- ✓ Longer in-depth sessions (Social Work, CAMS) - recorded or not recorded
- ✓ Use of recordings and/or presentations with larger groups remotely (Trauma Simulation)
- ✓ IPE Group Simulations
 - Virtual Delivery
 - What are best practices?
 - What does Telehealth look like for each profession and together?
 - What is the Zoom Etiquette with a large IPE Learner group?
 - Pre-session planning? Post-session planning/follow up?

Inter-
professionalism

Activity

Conclusions

Opportunities for Inclusion in IPE Simulation

- ✓ Consider broad case ideas to be inclusive of other professions
 - Build out your **Learning Objectives (3) & Learner Tasks (3)**
 - Learning Objectives: What are you wanting them to gain educationally from this simulation?
 - Learner Tasks: What should they do or achieve during the simulation i.e. where to go/what to consider when engaging the SP?

- ✓ Connect with your Colleagues in other programs to develop cases together
 - Existing organic connections - who do you present with, communicate with, etc.?

- ✓ Contact IPE
 - Contact us via e-mail and we can provide support with case develop
 - We are here to encourage case development and offer support

Conclusions

Conclusions

- Telehealth, telemedicine, and mHealth are rapidly changing the care delivery ecosystem
- Climate characterized by new skills and new expectations; communication and exams
- OU needs to teach, model, and evaluate new competencies
- Chance to experiment, learn, and contribute to the future landscape in health education

medical
