- American Association of Colleges of Osteopathic Medicine
- American Association of Colleges of Pharmacy
- American Dental Education Association
- Association of Schools of Public Health
- Association of American Medical Colleges

Team Based Competencies: Building a shared foundation for education into clinical practice

IPEC and the Expert Panel to develop competencies for interprofessional collaborative practice appreciate the support of the Health Resources and Services Administration, Josiah Macy, Jr. Foundation, Robert Wood Johnson Foundation and ABIM Foundation in sponsoring this conference to use the recommendations of the Expert Panel as a stimulus for discussion of the core issues surrounding preparation for interprofessional, collaborative practice.

The goals for this conference are to:

- Examine a set of foundational competencies to guide the professional socialization of future health professionals to deliver interprofessional collaborative care that is timely and consistent in quality.
- Assess the relevance of these core competencies for the current practice of interprofessional team-based clinical care and identify any significant gaps
- Develop an action plan to catalyze the widespread implementation of these competencies in health professions education and practice including identification of critical opportunities and challenges

BACKGROUND

Interprofessional Education Collaborative (IPEC)

In 2009, six national education associations of schools of the health professions (AACN, AACOM AACP, ADEA, AAMC and ASPH) formed a collaborative to promote and encourage constituent efforts that would *advance substantive interprofessional learning experiences to help prepare future clinicians for team-based care of patients.*

To help guide educational programs and stimulate joint learning in the six professions, the collaborative convened an expert panel, with two appointees from each association, to recommend *a set of core competencies that will lay the foundation for interprofessional collaborative practice.*

The panel began its work by reviewing all relevant statements on interprofessional competency previously developed by organizations in the United States and Canada, as well as international groups and agencies.

IPEC EXPERT PANEL RECOMMENDATIONS

Core Competencies for Interprofessional Collaborative Practice

The panel's recommendations are available to serve as the stimulus for dialogue and development of an action plan to catalyze the widespread implementation of these competencies in health professions education and practice, with particular focus on opportunities for and challenges to implementation.

Interprofessional Competency Domains

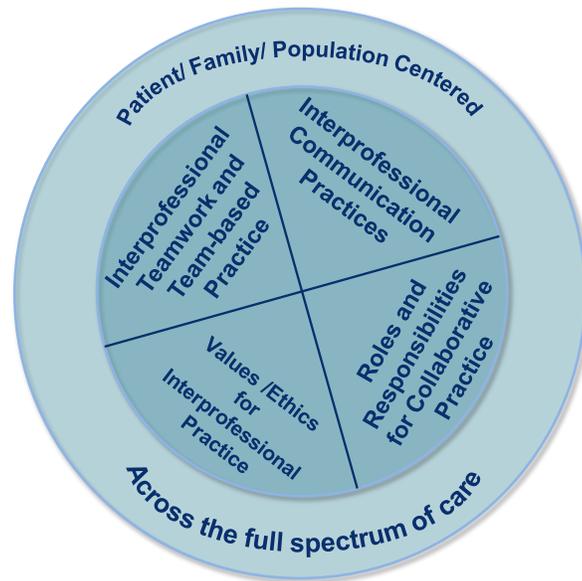

The panel identified four core competency domains that draw meaning from the specific contexts of patient care. Development and demonstration of these competencies requires reflection, flexibility, and adaptability to the spectrum of care contexts – from prevention and health maintenance to acute, chronic, long-term and palliative care - and the overall goals of care in specific situations. These competencies are a key adjunct to the general professional competencies of the individual health professions.

- Values/Ethics for Interprofessional Practice
- Roles/responsibilities for Collaborative Practice
- Interprofessional Communication
- Interprofessional Teamwork and Team-based Care

Competency Sets

Competency statements were drafted to include the following properties: relationship-centered; process oriented; able to be integrated through the learning continuum; applicable across practice settings and professions; stated in “common language”; patient centered; outcome driven. Graduates of health professions programs should be able to demonstrate ability to perform each of the competencies in the context of patient care and population health.

Interprofessional Collaborative Practice Core Competency Domains

The Learning Continuum

Values/Ethics for Interprofessional Practice

Work with individuals of other professions to maintain a climate of mutual respect and shared values

- Place the interests of patients and populations at the center of interprofessional health care delivery
- Respect the dignity and privacy of patients while maintaining confidentiality in the delivery of team-based care
- Accept and embrace the cultural diversity and individual differences that characterize patients, populations, and the health care team
- Recognize and respect the unique cultures, values, roles/responsibilities and expertise of other health professions
- Work in cooperation with those who receive care, those who provide care, and others who contribute to or support the delivery of prevention and health care services
- Develop a trusting relationship with patients, families and other team members (Canadian Interprofessional Health Collaborative 2010)
- Demonstrate high standards of ethical conduct and quality of care in one's contributions to team-based care
- Manage ethical dilemmas specific to interprofessional patient/population-centered care situations
- Act with honesty and integrity in relationships with patients, families and other team members
- Maintain competence in one's own profession appropriate to scope of practice

Roles/Responsibilities for Collaborative Practice

Use the knowledge of one's own role and those of other professions to appropriately assess and address health care needs of the patients and populations served.

- Communicate one's roles and responsibilities clearly to patients, families, and other professionals
- Recognize one's limitations in skills, knowledge and abilities and engage others when appropriate
- Engage diverse health care professionals who complement one's own professional expertise, as well as associated resources, to develop strategies to meet specific patient care needs

May be reproduced and distributed according to the terms set forth at the end of this document.

- Explain the roles and responsibilities of other care providers and how the team works together to provide care
- Use the full scope of knowledge, skills, and abilities of available health professionals and health care workers to provide care that is safe, timely, efficient, effective, and equitable.
- Communicate with team members to clarify each member's responsibility in executing components of a treatment plan or public health intervention
- Forge interdependent relationships with other professions to improve care and advance learning
- Engage in continuous professional and interprofessional development to enhance team performance
- Use unique and complementary abilities of all members of the team to optimize patient care

Interprofessional Communication

Communicate with patients, families, communities, and other health professionals in a responsive and responsible manner that supports a team approach to the maintenance of health and treatment of disease.

- Choose effective communication tools and techniques, including information systems and communication technologies, to facilitate discussions and interactions that enhance team function
- Organize and communicate information with patients, families and health care team members in a form and format that is understandable, avoiding discipline-specific terminology when possible.
- Express one's knowledge and opinions to team members involved in patient care with confidence, clarity, and respect and work to ensure common understanding of information, treatment and care decisions
- Listen actively and encourage the ideas and opinions of other team members
- Give timely, sensitive, instructive feedback to others about their performance on the team, and respond respectfully as a team member to feedback from others
- Use respectful language appropriate for a given difficult situation, crucial conversation, or interprofessional conflict
- Recognize how one's own uniqueness, including experience level, expertise, culture, power and hierarchy within the health care team, contributes to effective communication, conflict resolution and positive interprofessional working relationships (University of Toronto 2008)
- Communicate consistently the importance of teamwork in community and patient-centered care

Interprofessional Teamwork and Team-based Care

Apply relationship- building values and the principles of team dynamics to perform effectively in different team roles to plan and deliver patient/population-centered care that is safe, timely, efficient, effective and equitable.

- Describe the process of team development and the roles and practices of effective teams
- Develop consensus on the ethical principles to guide all aspects of patient care and team work.
- Engage other health professionals- appropriate to the specific care situation – in shared patient-centered problem solving
- Integrate the knowledge and experience of other professions-appropriate to the specific care situation- to inform care decisions, while respecting patient and community values and priorities/preferences for care
- Apply leadership practices that support collaborative practice and team effectiveness
- Actively engage self and others to identify and constructively manage disagreements about values, roles, goals and actions that arise among health care professionals and with patients and families
- Share accountability appropriately with other professions, patients, and communities for outcomes relevant to prevention and health care
- Reflect on individual and team performance for individual, as well as team, performance improvement
- Use process improvement strategies to increase the effectiveness of interprofessional teamwork and team-based care
- Use available evidence to inform effective teamwork and team-based practices
- Perform effectively on teams and in different team roles in a variety of settings

Core Competencies for Interprofessional Collaborative Practice Panel Roster

(Panel Chair) Madeline Schmitt, Ph.D., RN, FAAN, Professor Emerita (of Nursing), University of Rochester

Sandra Carlin Andrieu, Ph.D., Professor and Associate Dean for Academic Affairs, Louisiana State University Health Sciences Center School of Dentistry

Amy Blue, Ph.D., Assistant Provost for Education and Professor of Family Medicine at the Medical University of South Carolina

Thomas A. Cavalieri, D.O., FACOI, FACP, Dean, Endowed Chair for Primary Care Research, Professor of Medicine, University of Medicine and Dentistry – New Jersey-School of Osteopathic Medicine

Jane Marie Kirschling, DNS, RN, FAAN, Dean, University of Kentucky College of Nursing

Kathleen Ann Long, Ph.D., RN, FAAN, Dean, University of Florida College of Nursing

Susan Mackintosh, D.O. MPH, Director of Interprofessional Education, Western University of Health Sciences and Assistant Professor, College of Osteopathic Medicine of the Pacific-Department of Social Medicine and Healthcare Leadership

Susan Meyer, Ph.D., Associate Dean for Education, University of Pittsburgh School of Pharmacy

Daniel Robinson, Pharm.D., FASHP, Dean, College of Pharmacy, Western University of Health Sciences

Leo E. Rouse, D.D.S., FACD, Dean, Howard University College of Dentistry

Andrew A. Sorenson, Ph.D., Chair, USC School of Medicine-Greenville Institutional Self-Study Task Force, University of South Carolina School of Medicine (affiliation at time of panel appointment)

Thomas R. Viggiano M.D., M.Ed., Associate Dean for Faculty Affairs, Mayo Medical School, Professor of Medical Education and Medicine, College of Medicine, Mayo Clinic

Deanna Wathington, M.D., M.P.H., FAAFP, Associate Dean for Academic and Student Affairs, Office of Academic and Student Affairs, University of South Florida College of Public Health

Staff support was provided by Alexis L. Ruffin, MS, Director, Medical Education, Association of American Medical Colleges, Washington, DC.
